## State Forestry Nurseries Sold Record Number of Seedlings

Early reports indicate that Virginia's private woodland owners are once again among the leaders for the Nation in forest tree planting. Furthermore, the Virginia Division of Forestry tree nurseries produced a record number of seedlings which were sold to Virginia landowners. All Virginians can and should share in this accomplishment said State Forester Wallace F. Custard.

Virginia's total reforested acres on non-government land exceeded 84,000 acres during the winter and spring planting season of 1974-75. Although this is a little shy of the targeted one hundred thousand acres hoped for, Custard explained that the stalled economy is partially responsible for the shortage.

The Virginia Division of Forestry tree nurseries located in Augusta and New Kent Counties produced 26 different species of tree seedlings for Virginia landowners. The record production exceeded 53 million trees with the major species being loblolly pine.

Both nurseries will begin lifting, packaging, and shipping tree seedlings in mid-November. The estimated production will be equal to or exceed the record 1974 figures. Virginia landowners planning reforestation programs should consult with their local foresters so that orders for the proper species and number of trees needed can be processed, continued Custard.

"Virginians should be proud of their reforestation efforts. It is essential that we plant trees, pine especially, at an ever increasing rate to offset the pine deficit disclosed in the last forest inventory," said Custard. Foresters are now in the process of taking another statewide forest inventory. Results of this inventory will not be available until late 1976.

There are more than 68,000 wage earners directly dependent on the forest industry which is dependent on the raw material supplied by our forests. The citizens of the state and Nation demand the products of the industry. This means that we must continue a strong reforestation program and encourage wise management on all 16 million acres of Virginia's wooded areas.

Virginia can and must retain her leadership position because of economics and the many other forest resource related values, concluded Custard.

## To The Citizens Of Appomattox County

It has come to my attention that some people have raised the question of my physical ability to do the job of Clerk of the Circuit Court. It is true that I have a disability which I received in the defense of my country on foreign soil. I have worked since my discharge from service twenty-four years ago without loss of time due to my disability.

If the voters of Appomattox County honor me by electing me as Clerk of the Circuit Court of Appomattox County, I promise to devote my full time to serving the people of Appomattox County in that position.

I also promise the voters and citizens of Appomattox County that if elected to this most important position, I intend to serve my full term.
